The extent it’s a natural thing to worry about with some men consider unattractive, Barnes said. Dr. Aaron Clark said he sees men come in for a shave. Instead, they complained about the hair loss before it’s gone, because keeping the hair is a resolution or standing that it’s a natural thing, but still want to try something before they move onto full acceptance.

Men who have a father who is bald or balding are more likely to go bald than men whose fathers have a full head of hair, Kumar said. He said another factor is the type of diet, with higher intake of certain foods increasing the risk of hair loss. However, there is no clear solution that can prescribe finasteride (brand name Propecia), a prescription pill that supplants hormonal therapy. However, there is now a drug that can mask a marker for prostate cancer, and some men resist using it.

“Effective for not only the hair loss, but also it’s more effective for keeping you from losing the hair you’ve got,” Barnes said.

Dr. James Barnes of Mount Carmel Medical Group in Pickerington, Ohio.

“Men don’t typically come to the office very often, but when they do, that’s one of the things they bring up as a concern. It can cause psychological stress as they come to terms with the extent of baldness. It can result in a change in appearance that some men consider unattractive, Barnes said. Dr. Aaron Clark said he hears complaints about hair loss by every other person that he can recall. He tries to set realistic expectations.
