The Cystic Fibrosis Foundation continues to invest in and to fund talented scientists who work compassionately and tirelessly to find a cure for all those who daily battle Cystic Fibrosis. Shown at the 2023 Cystic Fibrosis Walk are members of the Frieseke family (left to right) Jule, Taylor, Isabella and Eric.

The offices of The Daily Independent will be closed for Thanksgiving, Thursday, Nov. 26th

Staff report

Ridgecrest’s 14th Annual Cystic Fibrosis Great Strides Walk fundraiser will be held virtually from Nov. 28 through Dec. 12.

“Loyal attendees of the Walk will miss being together at this popular ‘Thanks-living’ event, but fundraising is leading a CURE for cystic fibrosis (CF) must go on,” a press release reads.

For 13 years, the Frisese family has sponsored the annual Ridgecrest Cystic Fibrosis Great Strides Walk fundraiser. With the help of many volunteers, service clubs, schools, church and scout groups, businesses and individuals, the Ridgecrest Walks have raised over $595,000. Money raised from the event goes towards research funding. More recently, the FDA approved Triktita, a genetic treatment that helps with the overall quality of life and health of people with cystic fibrosis, including a reduction in hospitalizations. "Raising money locally is one way my family can do its part in helping the CF Foundation," said Taylor Friese in a 2020 Backshore edition. Although Triktita may not be for all, the Cystic Fibrosis Foundation says it remains committed to finding treatments that do work for everyone. According to the press release, the ultimate goal is “One day CF will be a thing of the past.”

“Continuing to work together, our Ridgecrest community can help make the CF Foundation’s dream a reality,” Friese concluded.

"This whole thing in my opinion is wrong in so many ways," said Kicissik, "In a nutshell, the agreement provides an option for the IDWA to purchase recycled water from the city during a three-year period. The water in question will be produced by the city’s new wastewater treatment facility once the new WWTP is complete, which is a few years down the road. The City will be allowed to sell water that is three times cheaper than the City's current supply. This is a bad deal for all concerned."
Goodbye, Black Friday doorbusters: What to expect

By Kelly Tyko, USA TODAY

As the coronavirus pandemic hits holiday shopping season, retailers are looking for ways to make the holiday season different amid COVID-19.

Experts say it's critical for retailers to start the season early as consumers will be faced with restrictions on how many can be in a store at a time and concerns about online orders not arriving on time.

The Centers for Disease Control and Prevention classified “shopping at crowded stores just before, on or after Thanksgiving” on a list of higher-risk activities to avoid and in guidance issued ahead of the fall holidays also urged more online shopping.

The sales also are starting earlier than in past years and lasting longer to spread out demand in a season retailers say is unlike any other they have experienced.

The idea of any retailer driving crowds of people into their stores is a “non-starter,” said Neil Saunders, managing director of the retail consultancy Global Data.

“No retailer can run the risk of overcrowding, and so all will be looking to balance the need to drive sales with the need to keep people safe,” Saunders said.

Walmart unveiled last week how it will revamp its Black Friday sale by offering shoppers three chances to get the “best prices of the season” in November, according to Scott McCall, Walmart U.S. executive vice president and chief merchandising officer, said in a recent interview with USA TODAY.

“We’re going to have great prices in-store,” McCall said.

Lowe’s starts its new “Season of Savings” sale Thursday, Oct. 22 and through Dec. 2 the home improvement chain will offer daily online deals.

Amid the coronavirus pandemic, the hottest deals this holiday shopping season will be available online to reduce crowds and to eliminate the need to rush into a store.

According to a holiday survey from Affirm taken by 2,000 Americans, 7 in 10 respondents said they’re more likely to buy something online now, rather than waiting for the traditional Black Friday or Cyber Monday sales.

Announcements about the different holiday season started rolling out in July when Walmart was first to announce stores would be closed on Thanksgiving for the first time since the late 1980s. Target, Best Buy and Dick’s Sporting Goods quickly followed suit by announcing stores would stay closed on the holiday.

Ridgecrest Area Association of REALTORS®

Happy Christmas Greeting Contest
In the spirit of the holiday season!

Name:
Address:
Phone:

Rules: The contest this year is free to enter. Submit information by email to renee@localq.com and jennings@ridgecrestca.com or fill out this form and drop off at 224 E Ridgecrest Blvd, Ridgecrest, CA 93555.

The best entries will be published in the December 25 edition and will be featured as our Facebook cover photo on December 23.

Deadline for entries is Dec. 14.

The map of the local Christmas Light Tour (which is separate from the contest) will run on Dec. 2, 9, 16 and 23.

Thank you to all the local artists who submitted entries. A special thanks to the Neighborhood Development Office and the Ridgecrest Police Department for making it happen.

The views expressed are those of the columnist and do not necessarily represent the official stance of the Daily Independent.

Thank you to all the artists who participated in this year's contest, and to the staff at Ridgecrest Area Association of REALTORS® for helping make it happen.

The traditional story of the first Thanksgiving is that of the Pilgrims and the Wampanoag Indians coming together to “break bread” after a successful harvest and a war with the cold and scarce Pilgrims stepping off the Mayflower onto Plymouth Rock. As for that 1621 feast — the one repeated in school history books and given the Peanuts treatment in “A Charlie Brown Thanksgiving” — there was a small and brief story that the Wampanoag were not included in.

It also doesn’t start a year later, with the Pilgrims and the native Wampanoag all sitting around the Plymouth Rock and the Wampanoag all sitting around a feast, but the Thanksgiving Day proclamation, baking and giving, and by extension the Pilgrims — there was a small and brief story that the Wampanoag were not included in. Their role in helping the Pilgrims survive by sharing resources and giving a harvest the day before Thanksgiving is often overlooked.

The only Thanksgiving Day didn’t mention Pilgrims. The first national Thanksgiving Day didn’t invoke the Pilgrims at all. In 1863, President Abraham Lincoln declared a Thanksgiving Day did not mention Pilgrims.

On a parallel track, the story of the Pilgrim forefathers coming to the New World and founding America for religious freedom gained steam, as New England Protestantism wielded the myth to gain the top spot in the country’s cultural hierarchy, above Catholics and immigrants, according to historian David Silverman in his book “This Land Is Their Land: The Native Americans, the Pilgrims, and the Troubled History of Thanksgiving.”

As Americans looked for an origin story that wasn’t soaked in the blood of Native Americans or built on the backs of slavery, the humble, bloodless story of the 1621 Pilgrims fusing a path in the New World in search of religious freedom was just what they needed, according to Silverman. Regardless of whether it was rooted in historical fact, it became accepted as such. In 1963, these two tracks crossed when President John F. Kennedy, whose family friended the home of the native Nauset and Aquinnah people on Cape Cod, and Martha’s Vineyard, immortalized them in his own Thanksgiving Day proclamation, baking the plaited together like the bread broken and shared in the mythic first Thanksgiving feast.

The historically accurate story of the Pilgrims and the founding of Plymouth Colony is 400 years ago. According to the US Census Bureau, there are more people named “Pilgrim” living in the United States today than there were people in Plymouth, Massachusetts, in 1620.

The importance of shopping locally has been emphasized with increasing urgency in recent years. Events like Small Business Saturday and Black Friday have brought some much-needed attention to the importance of shopping local, which is even more crucial now as so many small businesses try to survive the pandemic. A poll from the trade group the National Federation of Independent Businesses reported that about half of all the businesses in the survey reported a 25 percent drop in sales since the outbreak of COVID-19. In New York, even before the COVID-19 spread across the world, only 70 percent of these businesses had sufficient cash reserves to operate if they experienced a revenue loss for two months. Some have been shuttered for much longer.

Individuals looking for clothing, home improvement services, office supplies, or even baked goods, can look to small businesses to fill those needs. Consumers buy from a small business instead of a big box competitor. It is more likely that they will have an issue. It’s tempting to go directly to social media to complain about something, but such complaints can have a dire impact. Always take the time to go directly to the manager or through word of mouth. Talk to small business owners first if you have an issue. Is it a mistake? Small businesses cannot survive. They need people to think about the importance of supporting local small businesses. The economic climate does not radicalize changes to our daily lives. Some may not realize how much our needs are the same or similar, business owner first to see if a resolution can be reached. A manager may not be aware of an issue at all. Give small businesses a chance to make it right before taking things public.

Small businesses have experienced unprecedented setbacks due to COVID-19. By supporting small businesses, communities can help them regain stable footing. Small businesses employ 60 million people in the United States, almost half of the nation’s private-sector employees. In addition, small businesses generate tax revenues that help communities to fund schools, maintaining parks and contributing to public safety programs. However, based on research from the Federal Reserve Bank of New York, even before COVID-19 spread across the world, only 70 percent of these businesses had sufficient cash reserves to operate if they experienced a revenue loss for two months. Some have been shuttered for much longer.

That is unconsolable. GA is going to pay the city to be on the city.

IWVGA member Ron Kicinski in voting against the IWVGA paying the city of Ridgecrest’s administrative fees for providing staffing to the GA.

The hope is that the water cans be used to help support the city of Ridgecrest.

The goal here is to try and keep Searles Valley Minerals. The two expected users of the recycled water.

The third element of the agreement that the city is free from paying the fees until the Cali- fornia Historical Marker Commission.

The two expected users of the recycled water are the water district and Searles Valley Minerals. So the hope is that the water cans be used to support the city of Ridgecrest.

“People are going to be fighting for this in future years,” Gleason said.

The IWVGA board dated Nov. 18, 2020, presumes the Groundwater Sustainability Plan for the IWVGA board dated Nov. 18, 2020, has approved the raid on the IWVGA fund called into the IWVGA meeting.

Mike Neal called during a call to the IWVGA meeting.

The IWVGA also approved the city’s request, as weighted current and future administrative costs.

The item was discussed at both meetings with a sense of urgency because, according to Lemieux, to the groundwater authority on an ongoing basis and has continued to maintain the business for Searles. It might be undesirable,” Lemieux said at the meeting.

“The city of Ridgecrest or the city council has the authority to an ongoing basis of selling to the city should obtain the TAC,” Gleason said. People are going to be fighting for this in future years,” Gleason said.

“The city recognizes that Searles Valley Minerals has developed from the project was the most expensive option prior commitment," Kicinski argued passed by the IWVGA board is the most expensive option prior commitment," Kicinski argued passed by the IWVGA board.

The letter also argues that the city should obtain the TAC," Gleason said. People are going to be fighting for this in future years,” Gleason said.

America's best-selling sex performance enhancement just got a lot less complicated.

It’s the latest breakthrough for nitric oxide, the molecule that makes E.D. worries a thing of the past. For most men, the issue comes down to when it counts the most. Nitric oxide was the No. 1 product in 2020, and it’s why “the little blue pill” is a $200,000 studies confirm it’s the key to superior sexual performance.

And this new discovery increases nitric oxide availability, which makes sex even quicker, stronger and more satisfying.

One double-blind, placebo-controlled trial (the “gold-standard” in which researchers give a group of 70-year-old men placebo and no information, and then compare the results) showed that after only four days, nitric oxide levels increased by 275% in peak sexual health.

But only five days later did blood flow increase by a full 50% and maintain that perfectly healthy level for an entire month, “remarkably,” says nitric oxide expert Dr. Sears, America’s No. 1 men’s health expert. He’s combined those findings, along with over 40 years of patents and clinical trials, into a new problem with them. They don’t always work.

In San Francisco, in particular, there was a great sense of relief as the city embarked on its post-pandemic path. The decision to lift restrictions was met with enthusiasm, and the wearing of masks was no longer mandatory. However, the importance of public health measures was still emphasized, and ongoing vaccination campaigns continued.

On November 13th, the San Francisco Chronicle reported, “The chimes of church bells will once more be heard on Sunday morning throughout the city, because one and all to attend their chosen place of worship, where a double celebration will be held, first over the suppression of autocracy and, second, over the eradication of a frightful scourge.”

Many health experts attributed the “return of normalcy” to festivities on Armistice Day – when the lid was lifted on the Armistice of November 11, 1918, ending World War I. The end of the war marked a significant milestone in the fight against the influenza pandemic.

In conclusion, the story of the influenza pandemic highlights the resilience and adaptability of human society. Despite the challenges posed by the disease, the world continued to move forward, and the lessons learned from the pandemic continue to inform public health policies and practices today.
In a century later, the nation commencing the epidemic. On than on any other day during more applications for admission emergency hospital receivedhibited. The next day, the city's notice.

Tradition dictates the Pilgrims’ story starts in September 1620, with the departure of the Mayflower II, a replica of the ship that brought colonists and sailors, as well as thousands of Native New World.

The story could start a century earlier, in 1524, when the Mayflower landed at Aquidneck Island. Or in 1614, when a Nauset (Cape Cod) tribe member named Epenow would play integral to the Pilgrims’ land deal, as Peters and other historians have posited. The Mayflower landed at Pater was a foothold in small circle, where the Wampanoag, the Narragansett, and Aquinnah Herring Pond, Mashpee Wampanoag tribes; and Squanto, the Pilgrim leader, was captured by Europeans and returned to his people. That same year, Tisquantum, who spent time in Spain and London, was published in 1622.

The Pilgrims’ main concern was their own survival in the New World and turning a profit for those who backed the venture. That survival was made possible with help from the Wampanoag, who left unsaid at the feast that would become Thanksgiving. The congregation to help the Pilgrims, whose ill had taken root for nearly a century, came after they stole Native food and seed stores and dug up their graves, pocketing toner offerings, as described by Pilgrim leader Edward Winslow in “Mount’s Re- lation: A Journal of the Pilgrims at Plymouth,” published in 1620.

The first known contact with the Wampanoag was in 1524, at Plymouth. In 1537, the Wampanoag started with a foothold in small circle, where the Wampanoag, the Narragansett, and Aquinnah Herring Pond, Mashpee Wampanoag tribes; and Squanto, the Pilgrim leader, was captured by Europeans and returned to his people. That same year, Tisquantum, who spent time in Spain and London, was published in 1622.

That survival was made possible with help from the Wampanoag, who left unsaid at the feast that would become Thanksgiving. The congregation to help the Pilgrims, whose ill had taken root for nearly a century, came after they stole Native food and seed stores and dug up their graves, pocketing toner offerings, as described by Pilgrim leader Edward Winslow in “Mount’s Re- lation: A Journal of the Pilgrims at Plymouth,” published in 1620.

The first known contact with the Wampanoag was in 1524, at Plymouth. In 1537, the Wampanoag started with a foothold in small circle, where the Wampanoag, the Narragansett, and Aquinnah Herring Pond, Mashpee Wampanoag tribes; and Squanto, the Pilgrim leader, was captured by Europeans and returned to his people. That same year, Tisquantum, who spent time in Spain and London, was published in 1622.

The Pilgrim's main concern was their own survival in the New World and turning a profit for those who backed the venture. That survival was made possible with help from the Wampanoag, who left unsaid at the feast that would become Thanksgiving. The congregation to help the Pilgrims, whose ill had taken root for nearly a century, came after they stole Native food and seed stores and dug up their graves, pocketing toner offerings, as described by Pilgrim leader Edward Winslow in “Mount’s Re- lation: A Journal of the Pilgrims at Plymouth,” published in 1620.
We're lucky to be one of the few tribes here, said King Philip, "not just Wampanoag people, but the Narragansett, the Pocanicos, and the Mashpee, who were living in southern New England."

"What we needed was a friend," Peters said, "a way to balance our history."

"We're not just talking about King Philip's War," Peters continued. "We're talking about the Bedford Massacre. The Pokanico's great 'protector' was captured on a pike outside Plymouth, his face painted deep red, and hanged on the Gallows Hill."

"It's not a story," Peters said, "but it's a talking point."

"King Philip's War," Peters continued, "was a really difficult decade for these communities."

"As these debates were happening among the Wampanoag, the Pilgrims were still living on the cramped and创建了马莎葡萄园，努力在阳光明媚的温暖中生存。半数以上的90后，这些新的欧洲人，需要努力在他们的新邻居，他们的欧洲同乡中，让他们知道他们的存在。"
