DRAWING AN ASTRONAUT!

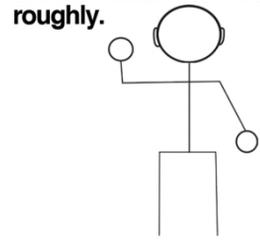

Get some paper, pencils or crayons and let's practice Drawing with Mark!

Start with stick figure and an oval. Don't worry about your lines being "perfect". You should sketch them out roughly.

Start adding tubes and ovals. (It's better to draw the stick figure FIRST. It's like drawing the bones, THEN the muscles).

Now we can add more detail. Study photographs to see what astronauts wore. Have fun designing your own space suits too.

Now we can add the face. Maybe draw your own face as the Astronaut!

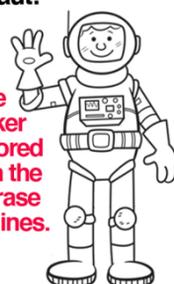

By using the stick figure, you can also make sure the legs are same size to each other.

Again, take the time to sketch "roughly". The lines don't have to be even and perfect.

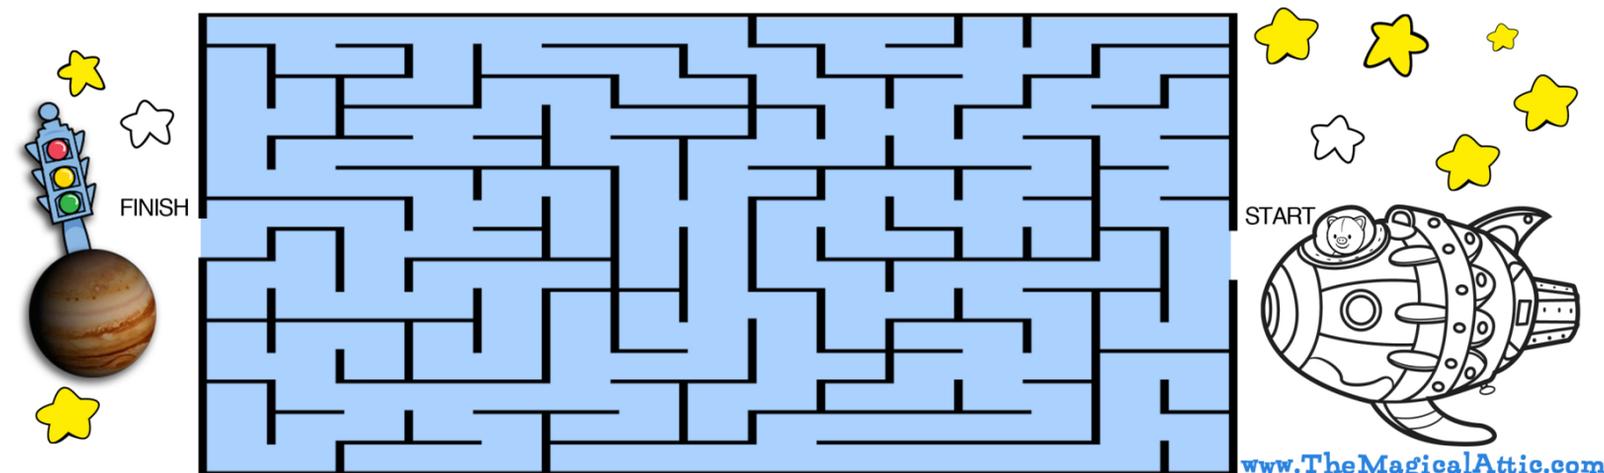

You can use a darker marker or different colored pencil to finish the drawing and erase the foundation lines.

LET'S PRACTICE DRAWING!
Get a pencil and use the grid below to draw Space ship as shown on left.
The grids will help you to line everything up!

Also, have fun drawing different expressions. You can put a new piece of blank paper over the grid & start again.

Send us your drawings! Please print your name and address clearly and send to:
Drawing with Mark 230 Central Street; Newton, MA 02466
